

OBSERVATIONS:

Yellow sticky note area for observations.

Plan:

Four horizontal red lines for planning.

Prepare & Maintain:

Seven horizontal red lines for preparation and maintenance notes.

Plant:

Four horizontal red lines for planting notes.

Harvest:

Four horizontal red lines for harvest notes.

**SOW & PLANT BY ZONE**

While colder zones may not be able to actively plant outdoors during January, milder climates still have the go-ahead.

Zones 7-10 can plant asparagus crowns and strawberry transplants, and set out transplants of broccoli, cabbage, spinach, lettuce, dill, parsley, cilantro, and chervil. Direct sow seeds of arugula, beets, bok choy, carrots, fennel, radishes, turnips, and peas.

Zones 9-10 can purchase seed potatoes and pre-sprout them for spring planting.

**INDOORS**

Zones 5-6 may start seeds of cauliflower, cabbage, leeks, and onions. Zone 6 can start seeds of pansies, snapdragons, dusty miller, begonias, and delphiniums. Zones 7-8 can start cauliflower, cabbage, kale, onions, broccoli, and lettuce seeds.

Zones 9-10 can start seeds for everything zone 7-8 can, as well as spinach, broccoli, peas, beets and carrots

**HARVEST BY ZONE**

Zones 4-6 can dig parsnips left in the ground over winter.

Zones 7-10 can harvest loads of greens and veggies including broccoli, arugula, cabbage, Brussels sprouts, cauliflower, collards, fennel, spinach, Swiss chard, radishes, leeks, kale, green onions, and mustard.
