

OBSERVATIONS:

Plan:

Four horizontal lines for planning.

Prepare & Maintain:

Seven horizontal lines for preparation and maintenance notes.

Plant:

Four horizontal lines for planting notes.

Harvest:

Four horizontal lines for harvest notes.

SOW & PLANT BY ZONE

Zones 5-6 can plant potatoes, and move cauliflower, cabbage, and broccoli transplants outdoors to a cold frame.

Zones 7-10 can plant chard, spinach, lettuce, turnips, radishes, carrots, and beets. Transplant your pepper, tomato, and eggplant seedlings outside, but be prepared to protect them if the weather gets below 45 degrees. Begin planting corn, cucumbers, squash, and beans.

Zones 9-10 can begin planting melons, sweet potatoes, and okra.

INDOORS

Zone 4 can start seeds of tomatoes, broccoli, Brussels sprouts, cabbage, cauliflower, eggplant, okra, onions, and peppers.

Zones 5-6 start seeds for peppers, tomatoes, and eggplant, while Zones 7-10 move their tomato, pepper, and eggplant seedlings to larger containers.

HARVEST BY ZONE

Zones 7-10 continue to harvest peas, lettuce, kale, arugula, beets, chard, fennel, broccoli, and cauliflower.
